

2021 Global Maritime Forum

Dr. Brian Bingham

Dr Brian Bingham is a Professor in the Mechanical and Aerospace Engineering (MAE) Department at the Naval Postgraduate School (NPS). Dr Bingham received his PhD in mechanical engineering from MIT in 2003. After a brief stint at the Ocean Institute in California, he was appointed to a post-doctoral position at the Woods Hole Oceanographic Institution, Deep Submergence Lab. Dr. Bingham has served as a member of the founding faculty at the Franklin W. Olin College of Engineering from 2005-2009 and the University of Hawaii at Manoa from 2009-2015. His research is on innovative tools for exploring, understanding and protecting the marine environment. This work includes projects on underwater navigation, autonomous vehicles and sensor integration. He currently serves as the Director of the Consortium for Robotics Unmanned Systems Education and Research at NPS and the Associate Chair of the MAE Department. .
