

2021 Global Maritime Forum

Mr. Guy Noll

Guy Noll leads the national mapping products department of Esri with maritime, aviation, topography production tools and automation of workflows and data quality extensions to ArcGIS. He also oversees the ArcGIS Maps for Adobe Creative Cloud software, and has a special interest in hydrospatial technologies. He is especially interested in implementations by partners and users of ArcGIS components that include maritime patterns such as disconnected editing, real-time observation and edge analysis with geofenced triggers and alerts, autonomous navigation support, and water column visualization.

Guy came to Esri ten years ago after over 24 years in the NOAA Corps. He is graduated from Whitman College and Columbia University in the 3-2 Engineering program, studying Math/Physics and Civil Engineering, a 2008 Fellow of the Department of Commerce Science & Technology cohort, and completed the 2009 Harvard Kennedy School of Government certificate program for Senior Managers and elected officials.
