

2021 Global Maritime Forum

Dr. Ballard Smith

Dr. Ballard Smith is currently the Innovation Area Lead for National Security Next and Outcome Lead for Undersea C3 at the MITRE corporation. In these roles, Dr. Smith oversees a large portfolio of internal research and development projects and helps to set priorities for Undersea related work. Previously, Dr. Smith was posted at the MITRE location in Honolulu, HI where he served as a technical advisor for USINDOPACOM where he helped to shepherd new undersea technologies in support of Joint Operations and has been working on technologies to improve and standardize undersea acoustic communications. He received his PhD from the MIT-Woods Hole Joint Program in Oceanography and Oceanographic Engineering where his research was on equalization to improve throughput and reliability of communication through the underwater channel. He currently lives with his family in Ithaca, NY.
